

The J Media

Assetzilla Scope of Work

Who we are?

At The J Media, we're not just another digital agency – we're your dedicated partners on the journey to online success. With a team of highly skilled professionals, we specialize in delivering tailored solutions that drive measurable results.

Project deliverables

Service	Description	Time	Price
Signup/ Login OTP Authentication	As per discussed, Signup/login Authentication Setup is already in the code, but it is commented out because there was some issue in TLD registration. It won't require more effort in development to start. We were using msg 91 for the OTP service before and we will go with that for the same.	1 hr	0/-
Payment Gateway Installation	Following our discussion, it has been decided to integrate a payment gateway into the "Book Now" section of each product page. Additionally, we will incorporate a feature to calculate charges, which will be set at 1% of the property price. The chosen payment gateway for this implementation is Razorpay. It is summarized below; <ul style="list-style-type: none">Integrate the payment gateway (Likely to be of PayUMoney or Razorpay) which will open up a screen to pay the booking amount (1-2% of the property amount).Also need to collect user details including Aadhar and contact details.	3 Weeks	45,000/-
Payment Gateway Backend	We will build a dashboard that will show all the data about payment done		25,000/-

Dashboard	by users. Details will include contact details, payment timing, payment id and all the information we'll receive from the payment gateway provider.		
Email Scheduling	<ul style="list-style-type: none"> Users will receive a follow-up email every 7 days, containing information on 5 similar properties in the same location as their previous search. Lead for previous search is present at 5 different data sources. The Email is to be sent at the same time when the last search was made. Additionally, the email will include a see more (<i>call-to-action</i> (CTA)) button for further engagement. The email format will be the same as that of the newsletter format that is being already sent to the user. 	2 Weeks	35,000/-
Google Analytics	Google Analytics was working fine till September-2023, but after that it stopped working. We need to make it work again.	1 Week	10,000/-
PDF Viewer Issue Resolution	On the property page, there is some issue in the PDF viewer. We need to update code and set up PDF viewer.	1 Week	10,000/-
Progressive Web App	Users can easily access Assetzilla directly from their app list. They'll receive a notification when they visit website prompting them to save it to their home screen. This will boost our traffic retention efforts.	1 Week	25,000/-
Progressive Web App Push Notification	When users allow Assetzilla to send notifications, they'll receive push notifications. This will help us keep more traffic on our website and encourage users to revisit it.	1 Week	35,000/-
Total			1,85,000/-

Timeline: We will be delivering this project within 30 Days.

Bugs, we found on the website that need to be resolved.

Other Bugs	Time	Price
Reduce Load Time	We can estimate time and pricing only after analyzing the code.	
Every tab opens independently.		
Google Maps warning about the feature depreciation		
Get free consultation form is not protected (It accepts all values rather than being specific).		
Too much refreshment to render something.
